PRINTING INSTRUCTIONS

Tiana's Closet sewing patterns are in PDF format which means at size one (one of a kind) the print can be shown in inches. It is recommended to use the "Actual Size" setting when printing. Some PDF viewers will print the pattern at the displayed size, so it is important to check the "Actual Size" setting in the printer dialog box. Some PDF viewers also have a "Fit to Page" setting, which will scale the pattern to fit the page, which will distort the size. Please consult your PDF reader documentation for specific instructions on how to print at actual size.

When printing the pattern, go to "Print settings" in "Print Ink & Color Options" and choose "Custom" "Page Scaling" and set it to "None". Some PDF viewers may also have a "Page Scaling" option. Make sure it is set to "None" or "Actual Size". Some PDF viewers may also have a "Fit to Page" option. Do not choose this option, as it will distort the size of the pattern. Print a test page and measure the test square to ensure the pattern is the correct size.

Always print the first page of the file and measure to avoid waste of paper.

Tiana's Closet patterns are designed for a seam allowance of 1 centimeter. Adjust the margin according to their requirements. For example, 0.5cm if you prefer a smaller seam allowance, or 2cm if you want a larger seam allowance. The margin should be at least 1cm to ensure that the edges are cut.
