Hip centimeters	84	89	94	99	105	114	125	135	145	155

PRINTING INSTRUCTIONS

Tiana's Closet patterns are made in Adobe Illustrator CC 2017 format, which means all sizes are nested in one file and can be printed in multiples. It is recommended to use Adobe Acrobat Reader DC to open the pdf file and print it. Make sure that the scaling is set to 100% and that the page size is set to A4 or Letter depending on your paper size. Do not scale the pages to fit paper size. Do not use the "Fit to page" option. Do not use the "Shrink oversized pages" option. Do not use the "Auto-rotate and center" option.

Before cutting the pattern, go to Print settings, in the Info tab (where options come up after you click on the printer name), make sure that the page size is set to the correct size (not another A4 or Letter paper size), check that the scale is set to 100% and that the page position is set to "Centered". Make sure that all other options are off and that the tab is set to "Pages".

Print the test square and measure (horizontal and vertical lines perpendicular to the grainline) to make sure that the square is 10 centimeters (4 inches) on each side.

Always print the first page of the file (and measure to avoid wasted paper).

Tiana's Closet patterns are made with the grainline (the line that shows the direction of the fabric grain) and the fold line (the line that shows where the fabric should be folded) in mind. Make sure that the grainline is parallel to the fold line and that the fold line is perpendicular to the grainline. Place the pattern piece on the fabric so that the grainline is parallel to the selvedge (the edge of the fabric that does not fray). Place the fold line on the fabric fold. Pin the pattern piece to the fabric and cut. Do not cut along the fold line, instead, cut the fabric on the other side of the fold line. Do not cut along the grainline.

Tiana's Closet patterns are made with seam allowance. The seam allowance is 1 cm (0.4 inches) wide. Make sure that the seam allowance is 1 cm (0.4 inches) when you sew the pieces together. For example, when sewing the front facing to the front, make sure that the seam allowance is 1 cm (0.4 inches) when you sew the front facing to the front. Do not use the edge of the fabric as a guide for the seam allowance, instead, use the edge of the presser foot as a guide for the seam allowance. Do not use the edge of the fabric as a guide for the seam allowance, instead, use the edge of the presser foot as a guide for the seam allowance. Do not use the edge of the fabric as a guide for the seam allowance, instead, use the edge of the presser foot as a guide for the seam allowance.
