PRINTING INSTRUCTIONS

1. Print this document on a standard printer using a standard 8.5x11 inch paper. If you are using a different paper size, you may need to adjust the scale. It is recommended to use Adobe Acrobat Reader to print the patterns. If you are using a different printer, please refer to the printer's manual for more information.

2. Before printing the patterns, go to the settings in the file menu and choose Custom Color: 100% for Scoping mode or Actual Size to print true to size. Make sure the printer is set to print in black and white. If you are using a color printer, you may want to print the patterns on a lighter color paper to save ink.

3. The test square is 10 centimeters (3.94 inches) square and is included for scale. Always print the test square of the pattern to avoid waste of paper.

4. After printing the pattern, cut the paper along the lines with scissors, a utility knife and tape the paper according to the instructions. For example, page 1A is taped to page 1B in a row, and page 1A is taped to page 2A in a column. Please see the photo below to confirm the paper layout.

5. You can find photo instruction for printing sewing patterns on Tiana's Closet website: <https://www.tianascloset.com/2021/01/15/how-to-print-sewing-patterns/>
